SUMMARY

- Founded in 1996
- Minority Owned; Small Disadvantaged Business (SDB)
- Professional Services Firm Supporting US Government and Commercial Clients
- 125+ Full-Time Technical, Management, and Administrative Employees
- DoD- and DOJ-Cleared Personnel
- In-House Information Technology Professionals, Systems Engineers, Intelligence/Geospatial Analysts, and Data Analysis Specialists

Examples of Contract Experience

For the US Department of the Interior National Park Service (NPS), NWS personnel provide desk side and telephone support for hardware, software, network connectivity, and Internet use for NPS staff located in the Northeast Regional Office. NWS operates and maintains a web-based, central help desk supporting hardware (desktop, notebook systems, and peripheral devices) and software (Lotus Notes client software, MS applications, Windows OSs). NWS staff analyzes and resolves problems and escalates problems to other IT staff, vendors, and maintenance personnel as needed.

In support of the US Army Corps of Engineers (USACE), NWS provided a wide range of IT services supporting computer hardware: software; communications; e-mail accounts; desktop and laptop systems; Internet; local area network (LAN), metropolitan area network (MAN), wide area network (WAN) interoperability; and computer support to local and remote users. On another contract supporting USACE, NWS personnel performed the Item Unique Identification (IUID) of approximately 10,000 or one-third per year of 30,000 personal property items maintained within USACE's Automated Personal Property Management System (APPMS).

On a contract supporting the Intelligence Community (IC), NWS evaluated and made recommendations on the technical, economic, and operational feasibility of commercially-available systems and database management software products; provided 24-hour technical expertise for troubleshooting and problem resolution; installed upgrades, tested and planned migrations to new versions of all Government database software and COTS packages; and provided technical expertise to Database Administrators in the installation and configuration of databases.

For the IC, NWS played a leadership role in an Enterprise Help Desk Environment, supporting the Directorate LAN staff's efforts to coordinate and consolidate service operations. NWS provided systems integration, network management, LAN support, and network/database conversion support. Our engineers supported a wide range of IT platforms and products, including MS Windows and UNIX environments.

ENGINEERING AND TECHNICAL SERVICES

Examples of Contract Experience

NWS, as part of the National Systems of Geospatial Intelligence (NSG) Systems Integration (SI) team, coordinates directly with Government Entity Owners/Program Managers to develop transition requirements, Request For Changes (RFCs), Engineering Change Proposals (ECPs), and transition plans to establish the overall methodology for transitioning the entity/capability on schedule at minimal cost. NWS personnel are responsible for the coordination and oversight of technical exchange meetings, coordination within multiple segments and organizations, as well as liaising with Government and Contractor stakeholders and technical representatives to ensure minimal impact to the mission.

In support of the Intelligence Community (IC), NWS develops engineering assessments and concepts for technology insertion into the customer architecture; identifies and defines configuration management requirements; evaluates the insertion and implementation of technology options from a cost, schedule, performance, and risk management perspective; provides stable, timely, and appropriate engineering and integration expertise; develops innovative alternatives for systems integration and engineering challenges; and analyzes/evaluates maturing research and development technologies from internal and external sources for possible insertion into the customer architecture. On selected technologies, NWS assists with developing engineering assessments, concepts, and technology insertion plans. In support of the customer Readiness Process, NWS assists with the planning and development of material for configuration management reviews and communicates status in the form of in process reviews (IPRs), program management reviews (PMRs), and quarterly progress reviews (QPRs). NWS develops, presents, and reviews material for engineering review boards (ERBs), configuration management boards, Risk Management Forums, Senior Engineer Forums, and Senior Management Forums.

INTELLIGENCE SUPPORT SERVICES

Examples of Contract Experience

FMV/Geospatial Analysis—NWS deploys highly competent and experienced analysts forward to hostile fire zones within the DoD Central Command's (USCENTCOM's) area of responsibility (AOR). NWS provides geospatial expertise to include analysis of Airborne, National Technical Means (NTM), commercial, Overhead Non-Imaging Infra-Red (ONIR), and Full Motion Video (FMV) capabilities (imagery/geospatial analytical support) in support of the deployed mission. NWS personnel provide end-to-end imagery and geospatial expertise to military, intelligence, and coalition imagery users by utilizing their knowledge of ArcGIS and extensions: Falcon View, Erdas Imagine, GoogleEarth, Data Master, Socet GXP, RemoteView, Vitec Viper, Digital Imagery Exploitation Production System (DIEPS), and Integrated Exploitation Capability (IEC), as well as the use of a traditional hardcopy light table.

Exercise Support—NWS Exercise Agents support a wide array of National and DoD level exercises. Exercise Agents assist the Government during the planning, execution, and evaluation of assigned exercise events. In addition, Exercise Agents work closely with the Agency's Office of Military Support, Military Support Council (MSC), Support Teams (NSTs), Exercise Managers, Federal and National Agencies, State and Local Agencies, and members of various offices and directorates to ensure successful preparation and execution of exercise events. The Exercise Agents also help develop and write injects for play into the Master Scenario Event List meeting the objectives during the exercise. The Exercise Agents sit inside the Intelligence Control Cell (ICC) during the exercise monitoring Request for Information, level and effort of play, and assigning to Analysts for producing then disseminating products to the requestor.

ADMINISTRATIVE SUPPORT AND FACILITY MANAGEMENT

Examples of Contract Experience

NWS provides the IC with a wide range of TS/SCI cleared administrative support services and personnel at facilities in Bethesda, Maryland; Northern Virginia; St. Louis, Missouri; Florida; Colorado; West Virginia; Washington, D.C. Navy Yard; and other CONUS and OCONUS site locations.

NWS provided administrative services supporting the National Institutes of Health (NIH) National Cancer Institute's (NCI's) Immediate Office of the Director. NWS provided system administration, documentation and correspondence control, travel and meeting support, procurement, and scheduling/briefing book management for the NCI Director and staff.

For the US Department of Labor (DOL), NWS provides operations and maintenance on a 24x 7 basis for DOL at the Frances Perkins (FP) Building located in Washington, DC., including preventive maintenance, upkeep, repair, and maintenance for the maximum life of building structure and its equipment and systems. NWS provides labor services related to preventive and reactive maintenance in the form of Engineers, Electricians, Plumbers, Shift Supervisors, and general maintenance personnel.

In support of the Drug Enforcement Administration (DEA), NWS performed full life-cycle administrative, data entry, and data management services for more than 250,000 documents annually in support of DEA's Narcotics and Dangerous Drug Information System (NADDIS) and Defendant Statistical System (DSS) databases. NADDIS is the single, national, centralized repository of vital narcotics and dangerous drug information. NWS provided data capture, extraction, review, and analysis of investigative documents; on-line data entry; scanning and filing of source documents; and recommendations for revisions to standard operating procedures (SOPs)
